# **PROFESSIONAL SUMMARY**

Resourceful **Software Engineer** with over **4 years of experience**, specializing in web application development using various modern programming languages. Proven skills in data structures, algorithms, and JS frameworks such as Vue, React, and Node. Excellent communication and presentation skills, with a curiosity for new opportunities.

# **SKILLS & QUALIFICATIONS**

React.js, Vue.js, Javascript, HTML, CSS, JSON, AJAX, MongoDB, MySQL, Oracle, Node.js, Express.js, JQuery, Tailwind CSS, TypeScript, Object Oriented Programming, Data Structures & Algorithms, Omni CMS, Drupal, Git, Github, Visual Studio Code, Eclipse, Canva, Java, Zeplin, Figma, JIRA, Tableau, Web Application Development,.

## **PROFESSIONAL EXPERIENCE**

#### **Company: Vezham Role: Software Engineer**

- Led a team of 3 engineers in delivering cross-browser compatible solutions, improving mobile traffic by 40% through responsive design using Tailwind CSS and Figma.
- Made key technical decisions in adopting React.js and TypeScript for developing a customizable product tour feature, reducing onboarding time by 30% and improving user engagement.
- Drove performance enhancements in React.js apps by 22%, leading the team's adoption of code splitting and lazy loading techniques, significantly optimizing user experience across devices.
- Architected and implemented TypeScript wrappers for React.js, which increased codebase scalability and boosted user retention by 15%, enabling long-term product growth.
- Spearheaded the creation of a custom markdown package in React.js, reducing content creation time by 20% and improving efficiency for content teams.
- Integrated Node.js, boosting server response times by 30% and overall application performance.
- Reduced production issues by 30% and improved customer satisfaction by 20% by leading a team-wide initiative on proactive debugging and issue resolution.

Skills: React.js, Node.js, TypeScript, HTML5, CSS3, JavaScript, Tailwind CSS, Figma, Git, GitHub, MongoDB, JIRA.

# **Company: Zoho Corporation**

### **Role: Software Engineer**

- Revamped the front-end architecture by migrating to Vue.js, cutting page load times by 40%, eliminating performance bottlenecks, and significantly accelerating future feature development.
- Developed real-time chat application using Vue.js and Vuex, boosting scalability and enabling modular state management, which improved feature delivery speed.
- Developed a visitor tracking system for 2000+ users, leveraging Vue.js to optimize engagement by tracking user behaviors and prioritizing interactions for better resource allocation.
- Improved dynamic content loading and interaction using AJAX, enhancing UI responsiveness and making the application more interactive and user-friendly.
- Designed reusable Vue.js components, speeding up development for new features and ensuring consistency across different product areas.
- Delivered high-quality software in an agile environment, leading regular sprints and utilizing Git for efficient version control and collaboration.

Skills: Vue.js, HTML5, CSS3, JavaScript, Git, Zeplin.

### **EDUCATION**

M.S, Information Systems & Technologies | GPA: 4 | University of North Texas | May 2024

B.E, Electronics & Communication Engineering | GPA: 3.2 | Velammal College of Engineering & Technology | April 2019

#### Aug 2019 - Nov 2021 Chennai, India

### Jan 2022 - Mar 2024 Remote
